Chapter 2

General Description

2.1 Domain Stakeholders

2.2 System's Actors

The objective of this section is not to provide the full requirement elicitation document in this section but to reuse a part of this document to provide a informal introduction to the Messir specification of the system under development. The use case model is made of a use case diagrams modelling abstractly and informally the actors and their use cases together with a set of use cases descriptions. In addition, those diagrams and description tables are adapted to the Messir specification since actor and messages names together with parameters are partly adapted to be consistent with the specification identifiers (see [1] for more details).

2.3 Use Cases Model

This section contains the use cases elicited during the requirements elicitation phase. The use cases are textually described as suggested by the Messir method and inspired by the standard Cokburn template [2].

Environment Model

3.1 Environment model view(s)

There are no view(s) for the Messir environment model.

3.2 Actors and Interfaces Descriptions

We provide for the given views the description of the actors together with their associated input and output interface descriptions.

3.2.1 `actAbstractDispatchCoordinator` Actor

Actor
actAbstractDispatchCoordinator An abstract Actor which brings together the common operations of the FiremanCoordinator, the PoliceCoordinator and the TowServiceCoordinator.
OutputInterfaces

4.3 Concept Model Types Descriptions

This section provides the textual descriptions of all the types defined in the concept model and that can be part of the graphical views provided.

4.3.1 Primary types - Class types descriptions

The table below is providing comments on the graphical views given for the class types of the primary types. Type logical operations are precisely specified in the operation model.

Classes	
ctCrisisEvent A class containing the attributes identifying a crisis event.	
attribute	**comment: ptString**
attribute	**id: ptInteger**
attribute	**isLocationConfirmed: ptBoolean**
attribute	**location: dtMapWithPin**
operation	**init(Aid:ptInteger, Alocation:dtMapWithPin, AisLocationConfirmed:ptBoolean, Acomment:ptString, AgeoPos:dtGeoPos):ptBoolean**
ctDispatchedCoordinator A class containing the attributes identifying a dispatched team.

4.3.2 Primary types - Datatypes types descriptions

The table below is providing comments on the graphical views given for the datatype types of the primary types.

DATATYPES	
dtAddress	
A string used to identify location addresses.	
attribute	**value: ptString**
dtCrisisID	
An integer used to identify crisis events.	
attribute	**value: ptInteger**
dtPhoneNumber	
An Integer used to identify phone numbers.	
attribute	**value: ptInteger**

ENUMERATIONS
etDispatchStatus
A String used to identify a dispatch status.
etHumanType
A String used to identify an Human type.
etTeamType
A String used to identify a team type.

4.3.3 Primary types - Association types descriptions

The table below is providing comments on the association types of the primary types.

UNDIRECTED ASSOCIATIONS
