#### Chapter 1

#### Introduction

- 1.1 Overview
- 1.2 Purpose and recipients of the document
- 1.3 Application Domain
- 1.4 Definitions, acronyms and abbreviations
- 1.5 Document structure

#### Chapter 2

## General Description

#### 2.1 Domain Stakeholders

#### 2.2 System's Actors

The objective of this section is not to provide the full requirement elicitation document in this section but to reuse a part of this document to provide a informal introduction to the  $\mathfrak{Messip}$  specification of the system under development. The use case model is made of a use case diagrams modelling abstractly and informally the actors and their use cases together with a set of use cases descriptions. In addition, those diagrams and description tables are adapted to the  $\mathfrak{Messip}$  specification since actor and messages names together with parameters are partly adapted to be consistent with the specification identifiers (see [?] for more details).

## Chapter 3

## Additional Constraints
